- Data of Pulsar Bike has Been Chosen where the sales among 2 different age Group in different period of time is taken and shown whether there is any change in sales of bike after the advertisement and many related films to the pulsar bike.
- Performed Data cleaning process such as null values and duplicate values
- Performed Exploratory Data Analysis to investigate the dataset and discover the patterns and the anomalies.

Project Title: "**Customer Segmentation Using Unsupervised Learning**"

"**Breast Cancer Analysis**"

"**IMDB Analysis**"

"**Data Modelling with Multi Regression**"

Project Title: **"H2DB Student"**

- Language Used – SQL
- A Spring Boot application with the H2 database (SQL) for Student object consisting of id, age, name and represent Controller and service to return the list of all students, to return one particular student based on id, to delete a student based on id, to save the student data

Project Title: **"Flight Accuracy"**

- Predicted whether the person has diabetes or not using Logistic Regression in Machine Learning
- Students from our class made Rockets with Paper and Used it to find the Distance.
